

## **CCSVI and Stem Cell Therapy: Next Big Breakthrough for MS?**

### **“How MS patients can weigh up the risk benefit of new breakthrough treatments for MS”**

#### **Main Speaker: Dr. Chavdar Botev, MD, Stem Cell Specialist**

- One of the world’s leading specialists pioneering the use of stem cell therapy for regenerative medicine – particularly for neurological diseases including multiple sclerosis.
- Medical Director of the Procel Medical Center in Sofia, Bulgaria.
- Owner of the Immunonodus Medical Center, also in Sofia, specializing in regenerative medicine.
- Professional stem cell specializations: Separation, purification, purging, freezing and application for neurological, cardiological and hematological diseases.
- Extensive experience with bone marrow transplants and DNA-based vaccines.
- Author and co-author of numerous professional articles and abstracts dealing with MS and related diseases.

---
